

Silent Gliss Roman Blind System

Roman Blind Systems Silent Gliss 2320, 2330 & 2350

Design, Elegance & Functionality

The Roman blind systems Silent Gliss 2320, 2330 and 2350 are remarkably elegant blind systems with a precision mechanism concealed in a discreet and unobtrusive profile.

The systems Silent Gliss 2320 and 2330 are chain operated whereas the system Silent Gliss 2350 is motorised and can be operated by fixed wall switch or remote control.

Silent Gliss has developed a unique cord release mechanism that allows detaching and re-fixing of cords within seconds. Furthermore, cords do not need to be separated from the fabric for cleaning as the cord release pins guarantee that they stay in place during the cleaning process.

This new mechanism and the reliable Velcro tape make the maintenance of these Roman blind systems even more effortless.

Design and Function – a winning combination for Silent Gliss.

New wind-up mechanism.

The mechanism is concealed in an unobtrusive cassette.

Easy cleaning. Cords stay in place after cleaning thanks to the cord release pin.

The system Silent Gliss 2330 is produced with an optimised gear drive and can be used for fabrics heavier than 2.5 kg (4:1 ratio).

The system Silent Gliss 2350 represents the first Silent Gliss Roman blind system with a tubular motor completely hidden inside the cassette.

Technical Data

Silent Gliss 2320 & 2330
